

YEAR-ROUND MAINTENANCE SCHEDULE

To ensure peak performance of your diesel, Power Service recommends this maintenance schedule:

Silver for Summer

Every time you fill up

DIESEL KLEEN® + CETANE BOOST®

If temperatures are above 30°F, add Diesel Kleen + Cetane Boost (silver bottle) to clean injectors, boost power, lubricate pumps and injectors and restore lost power and fuel economy.

Endorsed by Cummins Inc.

White for Winter

DIESEL FUEL SUPPLEMENT® + CETANE BOOST®

If temperatures are below 30°F, add Diesel Fuel Supplement + Cetane Boost (white bottle) for winter operability to prevent fuel gelling and protect against fuel-filter icing.

Endorsed by Cummins Inc.

In a winter emergency

DIESEL 911®

Use Diesel 911 to reliquefy gelled fuel and de-ice frozen fuel-filters if your vehicle will not start or gain power in cold weather.

At least quarterly or as needed

CLEAR-DIESEL® FUEL & TANK CLEANER

Treat with Clear-Diesel Fuel & Tank Cleaner to remove water, disperse contaminants and ensure fuel is stabilized for long-term storage.

If microbial contamination is present

BIO KLEEN® DIESEL FUEL BIOCIDES & CLEAR-DIESEL® FUEL & TANK CLEANER

Treat with Bio Kleen Diesel Fuel Biocide to kill the microbes and Clear-Diesel Fuel & Tank Cleaner to remove the residual water and contaminants.

Performance
Maximize power and fuel economy

Winterization
Winterize diesel fuel

Fuel Tank Hygiene
Maintain fuel and tank cleanliness
